## KAOFIL

Kaofil is a versatile filler-grade kaolin formulated to deliver consistent performance across industrial applications, with a controlled particle size distribution, excellent dispersibility, and stable rheological behavior. Kaofil enhances processing efficiency and maintains uniformity in end products. Its low impurity content and good thermal stability make it suitable for both general-purpose and demanding environments. The product is available in spray dried, pulverized and lump forms.

### Applications

- Pesticides
- Refractories
- Rubber
